

AI Agent Frameworks

aifolks.org

An **AI agent framework** is a platform or set of tools that helps developers build autonomous AI systems called agents.

n8n.io

Workflow automation platform combining AI with business processes. Connect anything to everything.

airtop.ai

Intelligent browser automation API for AI agents.

github.com/FetchAI/uAgents

A library that allows creating autonomous AI agents in Python.

github.com/microsoft/UFO

UI-focused multi-agent framework for Windows OS interactions.

agentforge.net

A Python framework for creating, testing, and deploying LLM-powered agents.

superagi.com

A dev-first, open-source framework for building and managing autonomous AI agents.

aixplain.com

Production-ready AI Agents with Trusted outcomes, adaptable behavior, scalable deployment.

askmarvin.ai

AI toolkit for building natural language interfaces.

guardrailsai.com

A framework for orchestrating applications powered by autonomous AI agents and LLMs.

lavague.ai

Large Action Models framework to build AI Web Agents.

fastagency.ai

The fastest way to bring multi-agent workflows to production.

huggingface.co/docs/smolagents

Lightweight AI agent development framework for rapid creation of powerful agents.

github.com/ag2ai/ag2

Framework for orchestrating, optimizing, and automating LLM workflows with multi-agent systems.

QuantaLogic

github.com/quantalogic/quantalogic

QuantaLogic is a ReAct (Reasoning & Action) framework for building advanced AI agents.

mgx.dev

AI-driven multi-agent framework for automated software development and project management.

LiveKit

livekit.io

Realtime agents for voice

github.com/frdel/agent-zero

A dynamic, general-purpose framework for creating custom AI Agents

julep.ai

Framework for creating AI agents that remember past interactions and can perform complex tasks.

SIMULAR

similar.ai/articles/agent-s2

Agent S2 by Simular is an Open, Modular, and Scalable Framework for Computer Use Agents

haystack.deepset.ai

Deepset provides Haystack, an open-source NLP framework for building search systems and conversational AI.

guardrailsai.com

Framework for developing safe and reliable Generative AI applications.

ELIZA.OS

elizaos.ai

Powerful multi-agent simulation framework for creating and managing autonomous AI agents.

crew.ai

Platform for Multi AI Agents System for complex task execution.

flo-ai.rootflo.ai

It lets you easily build composable agentic workflows from using simple components to any size.
